

SAVE YOUR ENERGY

With Engineered Solutions for comprehensive upgrades.

Engineered Solutions Program

Running a facility is a tough job—and takes a lot of energy. Our Engineered Solutions Program can help you use less. The program provides financial incentives, project management, and technical expertise for energy efficiency upgrades, and helps you make them with **no up-front costs**.

Comprehensive upgrades include:

- Boiler upgrades
- Boiler temperature reset and system optimization
- Steam trap replacement
- Furnace upgrades
- Domestic water heating upgrades
- Demand control ventilation
- HVAC control upgrades
- Pipe insulation
- Absorption chiller replacement
- Packaged rooftop unit replacement
- Lighting upgrades

The program helps you reach greater incentive potential by bundling efficiency solutions into one comprehensive scope. It allows lower-cost measures, like lighting retrofits and pipe insulation, to offset higher-priced items, like boiler replacements.

Expert-provided turnkey services may include:

- Energy benchmarking
- A no-cost ASHRAE energy audit (Level 1 or 2)
- Engineering design
- Bid-ready document development
- Installation vendor selection assistance
- Construction administration
- Building commissioning
