

SAVE YOUR ENERGY

Because Strategic Energy Management (SEM) ensures ongoing energy savings.

Program Overview

Saving energy doesn't have to be complicated. With South Jersey Gas' (SJG) SEM offering, your business can reduce its carbon footprint without expensive infrastructure upgrades. SEM is a proven approach that can help reduce energy use, lower operating costs, and boost your bottom line. By focusing on smarter energy use and continual improvements, SEM will drive long-term savings and sustainability for your business.

Our team is here to support you through the entire process, offering expert guidance and resources at every stage.

How It Works

Request an audit. This program pays \$10,000 toward the cost of the audit, which will factor in your business's needs and explore opportunities for energy and cost savings.

Empower your energy team. Your internal energy team will learn about energy efficiency and pave the way for energy savings.

Set realistic goals. Put together an attainable action plan, including the implementation of low- or no-cost upgrades, and we'll help you achieve them. We provide ongoing guidance and support, measure your progress, and make any necessary adjustments.

Save your energy and get incentives. Watch your energy usage decrease and see your operating costs go down. Plus, receive \$0.50 for each therm saved and \$0.04 for each kWh saved – with no cost cap!

Eligibility

Your facility should be 50,000 square feet or larger with a recommended annual natural gas usage of 100,000 therms or more. In addition, historical gas and electricity utility usage data (such as interval meter readings or daily usage, if available) are required. Production data may also be requested (if applicable).
